

Retrospective sprint 1 (18 sep 2025)

Little Starfish retrospective

Outcome retrospective

- We should do better to get to school on time, getting there 5 or 10 minutes earlier instead of cutting it close everytime.
- We are often easily distracted, for example talking about offtopic subjects and not focusing on the task at hand. We should try to keep our focus more.
- We should try to take more initiative, we already do this quite well but we should keep it in mind.
- We should sit together more often and be more thoughtful about the planning of our tasks and do this on time instead of leaving it to the last minute.
- We need to prioritize documentation and tests more. We often forget to do this and it is important for the quality of our project and to show our progression.

Feedback for team members

Feedback Zoiye

Tops

- Good communication
- Well involved within the team
- Very creative

Tips

- Try to be less distracted and more focused on the project
- Be on time.

Feedback Michael

Tops

- Serious and helpful worker, takes care of his tasks
- Always on time

Tips

- Help the team more often
- Be more proactive in sharing ideas

Feedback Batuhan

Tops

- Works well with others and is involved in the project
- Reliable, makes sure his tasks are completed on time

Tips

- Ask more questions if you don't understand something
- Be careful with AI usage (make sure you really learn from it)

Feedback Matisse

Tops

- Disciplined
- Works attentively

Tips

- Try to always be on time or available

Feedback Shivanio

Tops

- Motivated, very focused on the project
- Takes a lot of good initiative
-

Tips

None

Development goal

Batuhan's development goal:

I want to ask for help more quickly during the upcoming sprint when I get stuck. Specifically, this means that no later than half an hour after I can't make progress, I will ask a teammate a question. I will keep a short log (in Obsidian) where I note when I got stuck, what question I asked, and to whom. This will help me work more efficiently and avoid wasting time.

Matisse's development goal:

I want to be on time for all team meetings and classes during the upcoming sprint. Specifically, this means that I will be present before the official start time for every scheduled meeting (daily standups, sprint planning, sprint review) and all classes. To track this, I will keep a simple log where I note for each meeting and class whether I was on time or not. This will help me be a reliable teammate and contribute to efficient meetings and classes.

Shivania's development goal:

By the end of the next sprint, I will deepen my understanding of the technologies I use by spending at least 2 focused learning sessions per week (e.g., tutorials, documentation, or pair programming). I will apply this knowledge directly in my tasks and share at least one insight or improvement with my team during a stand-up or review.

Zoiye's development goal:

Michael's development goal:

I want to improve my proactivity in team discussions and idea sharing during the next sprint. Specifically, I will aim to contribute at least one idea or suggestion in each team meeting (daily standups, sprint planning, sprint review). I will prepare by reviewing the agenda beforehand and thinking about potential contributions. This will help me become a more engaged team member and enhance our collaborative efforts.
